## Skills

Languages: Python, JavaScript, HTML & CSS  
Technologies: Node.js, Express.js, Bootstrap, jQuery, Git & GitHub, Selenium, Bash, Git, Beautiful Soup

## Experience

### Newsletter Sign-Up

Mailchimp API - User Application

- Built using components in Nodejs, Express.js, JavaScript and HTML & CSS, for layout Bootstrap 5 components.
- Designed and implemented data collection using Mailchimp API to update users with my blogs and future projects.
- The project is launched using Hyper command line on Heroku.

### Technical Blogs

Hashnode – Updates

- I post about tech experiences of the projects I built, tools I'm using, new technologies and interesting tech related topics.

### Simon Game

JavaScript & jQuery - Arcade Game

- This is a desktop fun game made for interesting user experience, I added sounds on the web page that is in sync with the user's interaction and choices with infinite levels.

### Automatic Job Application

Selenium – LinkedIn API

- Built a bot that applies the jobs instructed on LinkedIn as an aim to introducing my self to automation and API using Python, Selenium and Beautiful soup.
